

MUHAMMAD SUFYAN KHAN

.NET Backend Developer | C# | ASP.NET Core | Web API

📍 Karachi, Pakistan | 📞 +92 322 2323003 | ✉ khansufyanasim@gmail.com

Professional Summary

Computer Science undergraduate with hands-on experience in C#, .NET, ASP.NET Core Web API, Entity Framework Core, SQL Server, LINQ, REST APIs, JWT authentication, authorization and unit testing. Experienced in developing backend applications, APIs and database-driven solutions. Strong foundation in Object-Oriented Programming, problem-solving and software development.

Work History

.NET Full-stack Intern - 10Pearls Pakistan

Karachi, Sindh

04/2026 - 06/2026

- Built a full-stack task management app using ASP.NET Core Web API and React, with Entity Framework Core and SQL Server handling the data layer. This gave users a fast, reliable way to create and track tasks without lag or data loss.
- Added JWT authentication and role-based authorization so each user could only access what they were supposed to, closing common security gaps and keeping sensitive data protected.
- Wrote unit tests with xUnit and Moq to catch bugs before they reached production, cutting down manual testing time and making the codebase safer to change later.

.NET Development Intern - CodeLabs pvt ltd.

Karachi, Sindh

08/2025 - 10/2025

- Built and maintained ASP.NET MVC web apps with clean, well-separated code, making it easier for the team to add new features without breaking existing ones.
- Implemented authentication and role-based access control to lock down endpoints, reducing the risk of unauthorized users reaching sensitive parts of the app.
- Used C# and .NET to deliver backend features on tight deadlines, sharpening my ability to write dependable code as part of a fast-moving, collaborative team.

Projects

Cab Management System in .NET

- Built a ride-management platform with real-time ride status, trip tracking, and driver dashboards.
- Developed REST APIs and database functionality using ASP.NET Core Web API and Entity Framework Core

Web-Based Task Management System

- Built a full-stack task manager with JWT authentication and role-based authorization.
- Implemented soft delete, cascading logic, REST APIs, xUnit, and Moq for reliable backend functionality.

Education

Sir Syed University of Engineering and Technology, Karachi

Under Graduation (BSCS)

- 2023 – 2027 (Expected)
- GPA: 3.97

Government College for Men

Nazimabad, Karachi

Intermediate: Pre-Engineering

Skills

- ASP.NET
- C#
- Entity Framework
- Microsoft .NET
- .NET framework
- Web API development
- Database Management
- Unit Testing
- SQL
- ASP.NET MVC development
- HTML
- CSS
- Git version control
- JavaScript

Certifications

- Backend Development using ASP.NET Board Infinity
- C# for .NET Developers Board Infinity
- Foundational C# with Microsoft Microsoft
